ABSTRACT

This publication presents 1977-78 data on employee insurance programs provided by 1,078 California school districts and county offices of education that responded to a statewide survey conducted by the California State Department of Education. Individual school districts are listed alphabetically within categories according to the type of district and its level of average daily enrollment. County offices of education are listed after the school districts and are arranged alphabetically. Table 1 contains the annual dollar amounts paid by school districts for coverages provided to each certificated and classified employee. Three general categories are used: 1) amount paid for employee only, 2) amount paid for the employee and one dependent, and 3) amount paid for the employee and two or more dependents. Tables 2 and 3 contain summaries of the types of coverage for which the responding districts make contributions. (Author/JG)

Foreword

Approximately two years ago I met with representatives from the Association of California School Administrators, the California School Boards Association, and the California Teachers Association to discuss with them the need for cooperative efforts in collecting statewide educational data. We were especially concerned with the teachers' salaries and fringe benefits information that would be needed in the upcoming collective bargaining sessions. The three groups agreed that the Department of Education was the appropriate agency to assume responsibility for collecting the data, and the Department accepted the task.

The Department met its commitment a year ago to produce and make available, by February 1, 1977, the first edition of *District Paid Insurance Programs in California School Districts, 1977-78*. By publishing this current edition of the insurance document and its companion document, *California Teachers Salaries and Salary Schedules, 1977-78*, the Department has again met its commitment to provide an important tool for school districts and others to use in collective bargaining. You have in this publication the one official report on fringe benefits for California, and the information is presented in a manner that was mutually agreed upon by ACSA, CSBA, CTA, and the Department of Education. Another document, *Financial Transactions Concerning School Districts of California: Annual Report, 1976-77*, is frequently used in conjunction with the other two documents mentioned.

I do not propose that simply producing this publication will solve problems in collective bargaining or in other areas requiring the use of fringe benefits information; however, without an agreed upon data base, it would be almost impossible to begin productive discussions. I congratulate all those responsible for giving us this important tool. I thank the representatives from ACSA, CSBA, and CTA for working so cooperatively with us in this endeavor, and I hope that all participants in the collective bargaining process will find the fringe benefits document useful.

Now that we are in the era of collective bargaining, let us keep the concept of what happens to children uppermost in our minds. The children must be at the center of what goes on in the bargaining sessions. We cannot—we must not—permit the education of our children to become the first casualty in the battle over teacher representation.

I am ready to help you wherever and whenever I can. However, as I said last year, that does not mean that I am going to choose sides in collective bargaining. If I must choose a side, it will be with the children.

If our new law is going to work—if it is to provide the vehicle for effective teamwork—a great responsibility rests with the members of California's school district governing boards. They must ensure that the law works not only to provide fairness and equity for staffs but also to make certain that the children are the beneficiaries of what is done in our schools. In addition they must make certain that the public is made aware of the issues.

We are plowing new ground in California with the collective bargaining bill. The new law gives us a mechanism to settle disputes before they reach the crisis stage. But the best written law in the world is merely a hollow assemblage of words unless men and women of good faith are willing to make it work.

Introduction

The data presented in this publication were gathered in the survey of salaries and health and welfare benefits for 1977-78, conducted by the Bureau of School Apportionments and Reports, California State Department of Education. Approximately 1,078 school districts and county offices of education responded to the health and welfare benefits items on form number R-1, "County and School District Report on Salaries and Health-Welfare Benefits of Employees for the School Year 1977-78."

The tables in this publication are arranged alphabetically according to type of district and ADA range. Table 1 contains the annual dollar amounts paid by school districts for coverages provided to each certificated and classified employee. Three general categories are used: (1) amount paid for the employee only; (2) amount paid for the employee and one dependent; and (3) amount paid for the employee and two or more dependents. In some districts the same amount is entered for all three of the categories. This situation generally occurs in districts paying a composite rate offered by insurance carriers or in districts allotting a fixed dollar amount for each employee benefit.

Tables 2 and 3 contain summaries of the types of coverage for which the responding districts are making contributions. Two X's separated by a hyphen may be shown for an available coverage. The first X (prior to the hyphen) indicates a district contribution for an employee only; the second, for the employee and dependents. A blank indicates that the coverage is not furnished.

In a number of districts, employees are allowed a fixed dollar amount to use for their choice of coverage. For these districts X's are shown in the employee choice columns in Table 2 and Table 3. Coverages from which the employee and dependents may select are also indicated by an X in the appropriate column.

In all three tables the notation *data not furnished* has been inserted opposite the names of districts failing to complete the health-welfare items on form number R-1 by the November 10 deadline. *Data not furnished* should be distinguished from *no contributions*, which identifies districts that responded to the survey but make no contributions to insurance programs for employees.
